The Scotch-Brite™ Clean & Shine Pad shines the floor as you clean. With repeated use, your floors gradually achieve burnish-quality results without the extra step of actually burnishing. Using a low-speed auto scrubber with just plain water or neutral cleaner the Scotch-Brite™ Clean & Shine Pad effectively removes scuff marks faster than traditional floor pads, and lasts significantly longer.

Specialized abrasive particles are bonded to the non-woven construction with a durable resin system. 3MCF-SSCP - 3M™ Stainless Steel Cleaner and Protector with Scotchgard™, Ready-to-Use with Flip-Top Cap, 1 qt (946.4 mL) bottles, 6/case

3M™ Stainless Steel Cleaner and Protector leaves a transparent barrier of Scotchgard™ Protection between your surface and soil and oily residue. With repeated use, this barrier can help protect against surface corrosion and prevent soils and oily residue from sticking to stainless steel as compared to leading polishes.

Quick Clean Griddle Cleaning System:

SQUIRT — Pour Scotch-Brite™ Quick Clean Griddle Liquid 700-40 or 701* onto a hot griddle 300-350°F (150-180°C). The bubbling of this powerful liquid lifts and loosens stubborn burned-on food, soil and grease from the griddle surface.

SCOUR — Using the Scotch-Brite™ Griddle Polishing Pad 46 and the Scotch-Brite™ Multi-Purpose Pad Holder 405-R, apply light pressure and gently scrub the griddle.

SQUEEGEE — Use the Scotch-Brite™ Squeegee to reveal your clean griddle.

Keeping it "GREEN" with Americo Floor Pads

- Pads made from 100% recycled PET plastic.
- Specially formulated to biodegrade* in a fraction of the time that it takes conventional floor pads once discarded into an active landfill.
- Leaves no toxins or toxic remnants in the environment.

*ASTM D5511 testing shows 90% biodegradation of Full Cycle™ floor pad as compared to less than 7% on conventional pads. The ASTM D5511 test is a method that evaluates the biodegradability of plastic in anaerobic or oxygen-less conditions. These laboratory tests often show faster results than actual landfill conditions. The actual rate of biodegradation of Full Cycle™ pads, as well as the rate of all plastic materials in landfills, will be slower and will vary, dependent upon actual landfill conditions.

Unger Excella™ Floor Cleaning System

Unger Excella has been independently verified to clean and finish floors twice as fast as traditional methods. The Unger Excella combines dual-swivel handles and a self-guiding S-curve pole, providing a mopping system that is "self-steering". The system is the first one available that includes both a height adjustable pole and the ability to dispense liquid from the bottle on board. This combination of features provides dramatically faster cleaning with less strain, stress, and effort than any other mop currently available. The Unger Excella™ is suitable for use on all hard floor surfaces and for spot mopping, wet mopping, dusting and floor finishing applications.
